September, 1982

Preface

This revision of the Emergency Programs Information Center (EPIC) Animal Disease Thesaurus represents a continuing effort to delete unneeded terms and awkward phrases, combine similar terms, and substitute or insert single words as they were suggested by coders, indexers and Data Bank users.

The rationale of the revision procedure is to preserve the general format, as derived from the 1972 Veterinary Subject Headings of the Commonwealth Agricultural Bureaux (England), and expand the numbers of hierarchical trees, consistent with the Veterinary Multilingual Thesaurus of the Commission of the European Communities (K. G. Saur Publisher; Munchen, New York, London, Paris, 1979).

Virus nomenclature in this issue conforms to recommendations of the International Committee on Taxonomy of Viruses (ICTV) adopted by the World Health Organization (WHO).

The Thesaurus was first developed to fill a need for a method to index and code the veterinary literature for rapid retrieval of specific information on animal diseases exotic to the United States. It was later expanded to accommodate the coding of other diseases as well. This edition contains approximately 4,000 coded terms arranged in alphabetical and hierarchical sections.

The Animal Disease Thesaurus is continually revised, enriched, and updated with new concepts and scientific terms. Revisions are printed approximately annually by Veterinary Services, Animal and Plant Health Inspection Service, U.S. Department of Agriculture. The user desiring additional information or updated copies of the Thesaurus should contact:

Chief, Technical Support Staff
Emergency Programs
Federal Building
Hyattsville, MD 20782
Telephone: (301) 436-8087

INTRODUCTION

Format of Thesaurus

The first section of the hierarchical arrangement of coded terms. It is divided into 15 categories. Each category has up to four levels of keyword terms or concepts, the first level broader than the second level and so on, with the terms of narrowest meaning at the fourth level.

The second section is an alphabetical arrangement of the coded terms. The first six digits represent the code number and the next two digits indicate the category of the hierarchical section. Digits are followed on the same line by corresponding keywords. The first word or phrase is the coded keyword term or concept. It may be followed by slashes // separating it from the next broader term with which it is associated.

Usage

The tasks of assigning keyword code numbers to documents and developing an information retrieval strategy should begin with examination of the alphabetical section of the Thesaurus. The two digits immediately to the left of a selected keyword indicate the applicable hierarchical section of the Thesaurus. Within the appropriate hierarchy, available terms may then be scanned and those specific to the search request may be identified.

Those who wish to obtain information from the Emergency Programs Information Center or from other data bases that utilize this Thesaurus are advised to submit their request either directly by telephone or in writing. Personnel who are experienced in thesaurus applications can then select the best available coded terms and perform the actual retrieval function.
